

Advanced Preflight After Maintenance

How do the ailerons move? How should the trim tabs move? Mistakes after major repairs are not common, but the potential is there. Come to a discussion on spotting errors after maintenance is performed on your plane. Print out the attached documents to reference during the course of the discussion. This seminar just could help save you from a very intense situation in the future!

Directions: Meeting will be held in the Airport Administration Building. Fly-in aircraft should request to park on the north side of the airport, west of the tower.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
